## benefits of nebulizing

Nebulizing is an easy, heat-free way to enjoy Saje's 100% natural diffuser blends.

This ultrasonic technology combined with water and a diffuser blend, produces negative ions and aromas that elevate your well-being.

When used with your favorite Saje diffuser blend, the nebulizer's refreshing cool mist brings nature's goodness into your space, supporting balance and harmony.

Transform your surroundings with revitalizing air that's reminiscent of fresh mist off a waterfall. Add the Saje diffuser blend of your choice and enjoy fresh, inviting aromas any time.

soothing & relaxing diffuser blends:

## **recommended saje diffuser blends:**

Unwind / Tranquility / Stress Release

refreshing diffuser blends:

Refresh / Exhale / Rain Forest

tranquil diffuser blends:

Spa Spirit / Mountain High / After the Rain

revitalizing and energizing diffuser blends:

Brainstorm / Energy

Use only Saje diffuser blends; using other oils may result in malfunction.

## **product features**

- Uses an ultrasonic, heat-free system to disperse essential oil molecules into the air.
- May also be used as a humidifier.
- Digitally programmed to stop automatically.
- Energy efficient, whisper-quiet operation and auto shut-off.
- Operates with inner cover light on or off.

## specifications

Product Name	aromaGeni
Input Voltage	AC100-240V
Output Voltage	DC24V +/-5%
Rating Power	12W
Water Tank Capacity	1/3 cup (80 ml)
Misting Duration	approx. 3 hours continuous
Mist Output	approx. 4 tsp (+/- 1 tsp) or 20 ml (+/- 5 ml) per hour on continuous
Settings	continuous mist with light on or off
Light Options	No LED button light, inner cover LED light only
Coverage Area	approx. 200-300 sq ft
Dimensions	(D) approx. 4" x (H) 8" or (D) 108 mm x (H) 205 mm
Net Weight	approx. 9 oz (249 g)
Main Materials	Outer Cover: PP; Water Tank: PP

## diagram of parts

- k. Base

## operating instructions

1. Remove outer cover from the base and set aside.

2. Remove the water tank cover.

3. Fill water tank with room temperature tap water to no higher than max. water level line (1/3 cup/80 ml).

4. Add 10-15 drops (depending on preference) of your favorite Saje Diffuser Blend to the water.

5. Replace the water tank cover and then the outer cover, ensuring they are securely in place.

6. Connect power adapter to DC power jack at the back of unit.
7. Plug power adapter into electrical outlet and press the  button.
8. Press button once for misting with inner light cover on, press button twice for misting with inner light cover off. Press button a third time to turn unit off.
9. Unit will turn off automatically when water in water tank reaches minimum level (approx. 0-3 tsp OR 0-15 ml).
10. Unit will turn off automatically when water in water tank reaches minimum level (approx. 0-3 tsp OR 0-15 ml).

Please note: Run times and amount of water left in the tank after auto shut-off will vary due to climate, environment and other factors.

## care & maintenance

- If the unit is knocked over while in operation, water could leak into the internal mechanism of the unit; if this occurs, unplug from power, empty water and let unit dry out in well-ventilated area for at least 3 days.
- Turn off unit and unplug from the power adapter prior to cleaning.
- Remove cover and empty water from the water tank, carefully avoiding the air outlet side.
- If required, use a clean, soft, damp cloth to wipe down exterior of unit.
- Frequency of necessary cleaning is dependent upon usage and types of diffuser blends used (ie. how thick the essential oils are in the diffuser blend).
- To clean inside water tank, dispense a few drops of rubbing alcohol into tank and wipe with a clean, soft cloth.
- To clean ceramic disc at bottom of water tank, dispense a few drops of rubbing alcohol onto a clean cotton swab and wipe clean.

- The ceramic disc should be kept clean of mineral deposits and other debris for optimal misting. NEVER use any sharp objects to clean the ceramic disc as this will damage the disc permanently.
- For optimum results, clean the water tank before changing diffuser blends.

## **cautions**

- Only use the power adapter supplied with the device.
- Never operate the device if the power adapter is damaged.
- Do not use if any part of the device is broken.
- To reduce the risk of electric shock, do not attempt to service the device in any way other than as described in the “Care & Maintenance” section of this manual.
- Do not disassemble or attempt to repair unit; in the event of a problem, please contact 1-877-ask-Saje.
- When moving the device, hold securely by the base.
- Do not touch the highly sensitive ceramic disc with bare fingers.
- Always place the unit on a stable, level surface.
- Do not fill water tank directly from tap as water could spill into the internal mechanism and cause damage.
- Do not plug the unit into the wall socket with wet hands.
- To prevent damage to the ceramic disc, only use tap water at room temperature.
- Do not pour water or other liquid into the air outlet.

- Do not tilt, move or attempt to empty or refill unit while in operation.
- To prevent clogging and damage to the ceramic disc, always use clean water.
- Remove any liquid left in the water tank after each use.
- Always turn off and unplug the device during maintenance or when not in use.
- Ensure that the power adapter is not covered or blocked when plugged in; it must be able to dissipate the heat properly.
- Use only Saje diffuser blends; other oils may contain fragrances, base oils or synthetics that could result in malfunction. Some single note essential oils are also too thick or heavy for use in the nebulizer. See FAQs for more information.
- In case of smoke, unusual aroma, undue noise, or other malfunction, unplug the unit immediately and discontinue use. Further use may result in fire or electrical shock.
- Do not overfill or immerse the unit in water.
- Always keep unit out of reach of small children and pets.

## **fcc & ic statements**

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the

interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by Saje Natural Wellness Canada could void the user's authority to operate this equipment.

This device complies with Part 18 of the FCC Rules and ICES 001.

Although this product is tested and complies with FCC, it may interfere with other devices. If this product is found to interfere with another device, separate the other device and this product. Conduct only the user maintenance found in this instruction manual. Other maintenance and servicing may cause harmful interference and can void the required FCC compliance.

## faqs

Q: what if my unit does not turn on?

Power adapter may not be properly plugged in; ensure that the power adapter is properly plugged into the DC power jack and the electrical source.

Q: what if my unit does not mist or there is almost no mist?

There may not be enough water in the water tank; ensure that the water tank is filled to the maximum water level line.

The water level may be too high (higher than the maximum water level line); pour out excess water and try again.

The ceramic disc may require cleaning. Please see “Care & Maintenance” instructions.

Q: what type of water should go into my nebulizer?

To prevent damage to the unit, it's recommended to use room temperature tap water. To prevent clogging and damage to the ceramic disc, always use clean water.

Q: what type of oils can i put in my nebulizer?

Use only 100% natural Saje diffuser blends; other blends and oils may contain fragrances, base oils or synthetics that could result in malfunction.

Many single note essential oils should not be used in the nebulizer. Single note essential oils may have a thick or heavy consistency that can clog the nebulizer and cause it to stop working.

Saje diffuser blends have been carefully blended to be effective for you, and safe and easy to use in your nebulizer.
