benefits of diffusing

Diffusing is an easy, heat-free way to enjoy Saje's 100% natural diffuser blends.

This ultrasonic technology, combined with water and a diffuser blend, produces negative ions and aromas that elevate your well-being.

When used with your favorite Saje diffuser blend, the ultrasonic diffuser's refreshing cool mist brings nature's goodness into your space, supporting balance and harmony.

Transform your surroundings with revitalizing air that's reminiscent of fresh mist off a waterfall. Add the Saje diffuser blend of your choice and enjoy fresh, inviting aromas any time.

recommended saje diffuser blends:

soothing & relaxing diffuser blends:

- Unwind | Tranquility | Stress Release

refreshing diffuser blends:

- Refresh | Exhale | Rain Forest

tranquil diffuser blends:

- Spa Spirit | Mountain High | After the Rain

revitalizing & energizing diffuser blends:

- Brainstorm | Energy

use only saje diffuser blends; using other oils may result in malfunction.

product features

- Uses an ultrasonic, heat-free system to disperse essential oil molecules into the air.
- May also be used as a humidifier.
- Digitally programmed to stop automatically.
- Energy efficient, whisper-quiet operation and auto shut-off.
- Continuous mist with light on or off.

specifications

Product Name	Aroma Breeze
Input Voltage	AC100-240V
Output Voltage	DC24V
Rating Power	10W max.
Water Tank Capacity	6 fl oz (180 ml)
Misting Duration	approx. 9-12 hours continuous
Mist Output	approx. 0.5 fl oz +/-0.17 fl oz (15 ml +/-5mL) per hour
Settings	continuous mist with light on or off
Light Options	LED light; blue color only
Coverage Area	approx. 100-300 sq ft
Dimensions	approx. (D) 7" x (H) 6" or (D) 180 mm x (H) 149 mm
Net Weight	approx. 11 oz (320 g)
Main Materials	cover: PBT-S; water tank: PP

diagram of parts

- a. Cover
- b. Base
- c. Maximum Water Level Line
- d. Air Outlet
- e. Water Tank
- f. Ceramic Disc
- g. Mist Outlet
- h. On/Off Button
- i. LED Light
- j. DC Power Jack
- k. Power Adapter
- l. Measuring Cup

operating instructions

1. Remove the cover from the base to expose water tank.

max. water level line

2. Using the measuring cup provided, fill water tank with room temperature tap water to no higher than max. water level line (6 fl oz/180 ml).

3. Add 10-15 drops (depending on preference) of your favorite Saje diffuser blend to the water.

4. Replace the cover and ensure that it fits properly onto the base.

5. Connect power adapter to DC power jack on bottom side of unit.

6. Plug the power adapter into the electrical outlet and press the  button.

7. Press  button once for mist and LED light; press  button a second time for mist only (No LED light). Press a third time to turn off.

8. Unit will turn off automatically when water in water tank reaches minimum water level (approx. 0-3 tsp/0-15 ml).

9. Use only Saje diffuser blends; using other oils may result in malfunction.

please note: run times and amount of water left in the tank after auto shut-off will vary due to climate, environment and other factors.

care & maintenance

- Turn off unit and unplug from the power adapter prior to cleaning.
- Remove cover and empty water from the water tank, carefully avoiding the air outlet side.
- If required, use a clean, soft, damp cloth to wipe down exterior of unit.
- Frequency of necessary cleaning is dependent upon usage and types of diffuser blends used (ie. how thick the essential oils are in the diffuser blend).
- To clean inside water tank, pour a few drops of rubbing alcohol or Saje Multi Clean All Purpose Cleaner into tank and wipe with a clean, soft cloth. Do not use vinegar or dish soap.
- To clean ceramic disc at bottom of water tank, dispense a few drops of rubbing alcohol onto a clean cotton swab and wipe clean.

- The top of the ceramic disc should be gently wiped of mineral deposits and other debris for optimal misting. Never use any sharp objects to clean the ceramic disc as this will damage the disc permanently.
- For optimum results, clean the water tank before changing diffuser blends.

cautions

- Only use the power adapter supplied. Never operate the unit if the power adapter or any part of the unit is damaged or broken.
- To reduce the risk of electric shock, do not attempt to service the device in any way other than as described in the "Care & Maintenance" section of this manual. Do not plug the unit into the wall socket with wet hands.
- Do not attempt to empty, refill, move or clean unit while in use or plugged in. When moving the device, hold securely by the base. Always place the unit on a stable, level surface.
- If the unit is knocked over while in operation, water could leak into the internal mechanism of the unit; if this occurs, unplug from power, empty water and let unit dry out in well-ventilated area for at least 3 days.
- Do not touch the highly sensitive ceramic disc with bare fingers when the ultrasonic diffuser is in use or plugged in. To prevent clogging or damaging the ceramic disc when operating, use clean tap water at room temperature.

- Do not fill water tank directly from tap as water could spill into the internal mechanism and cause damage. Fill only to the water level line and do not overfill or immerse the unit in water. Do not pour water or other liquid into the air outlet.
- After each use, remove any liquid left in the water tank.
- Ensure that the power adapter is not covered or blocked when plugged in; it must be able to dissipate the heat properly.
- Use only Saje diffuser blends in device: other oils may contain fragrances, base oils or synthetics that could result in malfunction. Some single note essential oils are also too thick or heavy for use in the ultrasonic diffuser. See FAQs for more information.
- In case of smoke, unusual aromas, noises or other malfunctions, unplug the unit immediately and discontinue use. Further use may result in fire or electric shock.
- Always keep unit out of reach of small children and pets.
- Do not disassemble or attempt to repair the disc or unit; in the event of a problem, please contact 1-877-ASK-SAJE.

fcc & ic statements

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the

interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by Saje Natural Wellness Canada could void the user's authority to operate this equipment.

This device complies with Part 18 of the FCC Rules and ICES 001.

Although this product is tested and complies with FCC, it may interfere with other devices. If this product is found to interfere with another device, separate the other device and this product. Conduct only the user maintenance found in this instruction manual. Other maintenance and servicing may cause harmful interference and can void the required FCC compliance.

faqs

Q: what if my unit does not turn on?

Power adapter may not be properly plugged in; ensure that the power adapter is properly plugged into the DC power jack and the electrical source.

Q: what if my unit does not mist or there is almost no mist?

A. There may not be enough water in the water tank; ensure that the water tank is filled to the maximum water level line.

B. The water level may be too high (higher than the maximum water level line); turn off unit, pour out excess water and try again.

C. The ceramic disc may require cleaning. Please see “Care & Maintenance” instructions.

Q: what type of water should go into my ultrasonic diffuser?

To prevent clogging or damage to the unit or disc, it's recommended to use clean tap water at room temperature.

Q: what can i put in my ultrasonic diffuser?

We recommend using 100% natural Saje diffuser blends, as they have been carefully blended for safe and easy use in your ultrasonic diffuser. Other blends and oils may contain fragrances, base oils or synthetics that have a thick and heavy consistency and could result in your unit's malfunction.

All Saje 100% Pure Single Note Essential Oils may be diffused, except the following:

- Ylang Ylang
- Patchouli
- Sandalwood
- Jasmine
- Rose
